COMPACT PRESS-TO-RELAMP INDICATOR

The Mark 12 may be mounted individually or matrix mounted for caution light panels.

When matrix mounted, individual units may be replaced without interfering with adjacent units. This indicator is light weight front relampable, features screw terminals, and is available with T-1 or T-1¾ lamps

MOUNTING

Mounting is easily achieved by use of sleeve which securely clamps the flanged-front housing to the mounting panel with two #2 stainless steel screws and lockwashers. Mounting torque is 1 inch pounds ± .5.

The Mark 12 is designed so the front surface of the lamp capsule in the installed condition is approximately flush with a Mil-P-7788 panel. The unit will mount in panels .055 to .190 thick.

SCREW TERMINAL CONNECTION

No soldering required. The rear terminal block incorporates two terminal lugs.

The screw terminals are molded into place and will accept a terminal of .25 diameter relative to the #4 screw specified.

SPECIAL OPTIONS

1. Three terminal for individual lamp input and ground.

2. Pull to re-lamp rather than standard press-to-re-lamp.

   Contact Jay-El for ordering information.

PRESS TO RELAMP FEATURE

Pressing face of legend plate, releases lamp capsule for relamping. Capsule remains captive to housing during relamping, or it may be removed entirely from housing for complete replacement. Unit accepts two lamps.

WEIGHT

Weight is 0.9 ounce maximum (unsealed).

ENVIRONMENTAL SEALING - MIL-STD-108

The Mark 12 can be supplied with an integral seal which has passed Splash Proof requirements to Mil-Std-108, High Shock to Mil-S-901C and Mil-S-22885.

LEGEND REQUIREMENTS

Jay-El can provide P/N 30288 indicators with NVIS compatible lighting.

Many combinations of character or background illumination may be accomplished, including sunlight readable Display Type 8.

Display Type 8 Pushbuttons are available with T-1 or T-1¾ based lamps. T-1 lamps are recommended.
