BIOGRAPHY

Anthony J. Reardon, Chairman and Chief Executive Officer
Ducommun Incorporated

Tony Reardon is chairman and chief executive officer for Ducommun Incorporated.

As chairman, Reardon oversees all board functions and is responsible for the recruitment and on-boarding of new board members.

Reardon oversees the strategic direction of the growth oriented manufacturing company, which provides electronic and structural solutions to customers in the aerospace, defense, and industrial sectors.

Under Reardon's leadership, Ducommun has doubled in size through strategic acquisitions and organic growth. The successful integration of these acquisitions has strengthened the company's technical and manufacturing expertise, and diversified its customer base—positioning Ducommun as an innovative solutions provider in all the markets it serves. Reardon was instrumental in restructuring the company to improve manufacturing cycle time and customer service companywide.

With more than three decades of aerospace manufacturing and engineering experience, Reardon began leading the company as chief executive officer in 2010, and just prior to that, was named president and chief operating officer in 2008. Previously, he was named president of the company's Ducommun AeroStructures business unit in 2003. Reardon has held various senior management positions and began his career at Sundstrand Aviation.

Reardon holds a bachelor's degree in business administration from Loras College in Iowa and has done graduate work at Northern Illinois University. He serves on the board of regents for Loras College. He also serves on the board of governors for the Aerospace Industries Association. Reardon is a native of Chicago.

Founded in 1849, Ducommun Incorporated provides engineering and manufacturing services to the aerospace, defense, and other industries through a wide spectrum of electronic and structural applications. The company is an established supplier of critical components and assemblies for commercial aircraft and military and space vehicles as well as for the energy market, medical field, and industrial automation. It operates through two primary business units – Ducommun AeroStructures (DAS) and Ducommun LaBarge Technologies (DLT). Additional information can be found at www.ducommun.com.
