**FEATURES**

- High output power
- Low phase noise
- Internal or external reference
- Frequency up to 110 GHz

**APPLICATIONS**

- Instrumentation
- Local oscillators
- Subsystems

**DESCRIPTION**

OPL series phase-locked oscillators are offered to cover frequency range up to 110 GHz by utilizing high performance FET oscillators, Gunn oscillators or multiplier/amplifier chain to produce desired frequency and power output. The phase locked oscillators are offered with either internal or external referenced version. The phase noise of an externally referenced phase locked oscillator is depended on the quality of the reference signal.

**SPECIFICATIONS**

<table>
<thead>
<tr>
<th>FREQUENCY RANGE¹</th>
<th>5 to 40 GHz</th>
<th>40 to 60 GHz</th>
<th>60 to 110 GHz</th>

</tbody>
</table>

Note:

1. Consult factory for the frequency other than listed;
2. Frequency stability is with internal reference;
3. 100 MHz external reference is for standard model. Consult factory for the frequency other than 100 MHz.

**HOW TO ORDER**

Specify Model Number

OPL-CO CF PP X – Y Z

- RF Port Connector Type
- Center Frequency in GHz
- “E” for External; “I” for Internal Reference
- Factory Reserve
- Output Power in dBm

Example: To order an output frequency 94 GHz, 17 dBm output power phase locked oscillator with WR-10 waveguide interface and externally referenced specify OPL-109417X-EZ.
